Summary

Motivated and detail-oriented Frontend Developer with 3 years of experience, skilled in building responsive, user-friendly web applications using Next.js, React, TypeScript, Tailwind CSS, and GitHub for version control. Founder of EazyCodes, a tech startup focused on fintech solutions, and experienced coding instructor with a passion for empowering learners. Skilled at transforming design concepts into functional products, solving problems efficiently, and continuously improving through self-learning and teaching. Seeking a role where I can contribute creativity, technical expertise, and a growth mindset to a dynamic development team.

Experience

Founder | EazyCodes

📅 Nov - 2023 – Present

- Pioneered fintech web applications, including X2Factor lottery app, utilizing Next.js and Tailwind, resulting in a 200ms reduction in API response time enhancing user experience.
- Built a modern personal portfolio leveraging React and TailwindCSS to showcase projects and technical skills, improving recruiter accessibility and providing a streamlined user experience..
- Directed end-to-end development lifecycle from concept to deployment, ensuring timely delivery of scalable and maintainable applications.
- Gained entrepreneurial experience in project leadership, client communication, and real-world problem-solving.

Coding Instructor | Aptech

📅 2024 – 2025

- Taught HTML, CSS, JavaScript, and React to beginners and intermediate learners, helping them build real-world projects.
- Simplified complex concepts for students through practical, hands-on coding sessions.
- Improved personal technical expertise by consistently preparing lessons, solving student challenges, and staying up-to-date with industry standards.
- Helped students launch their own projects, contributing to community growth and youth empowerment.

Education

Advanced Diploma in Software Engineering (Web Development Concentration)

Aptech Learning Education

📅 2023 - 2024

Self-taught Frontend Developer
Ongoing professional development through projects and teaching — 2023–Present

Projects

1. Note App – React.js, Node.js

- Developed a full-stack note-taking application with secure data storage.
- Implemented CRUD functionality (create, read, update, delete) for seamless user experience

2. Portfolio Website – React.js, MailJS

- Built a modern personal portfolio showcasing projects and skills.
- Integrated MailJS for real-time contact form functionality..

3. Weather App – React.js

- Created a weather forecasting app with live API integration.
- Displays real-time weather data with a responsive and user-friendly UI.

4. AJ Empire (In Progress) – React.js, Node.js, UI/UX

- Designing and developing a scalable platform for business use.
- Focused on frontend architecture, UI/UX, and backend integration.

Achievements

1. **Founded EazyCodes** – A tech startup focused on building fintech apps, websites, and empowering youth entrepreneurs.

2. **Taught 50+ Students** – Organized and delivered coding classes on HTML, CSS, and React, helping beginners transition into tech.

3. **Public Speaking & Performance** – Represented projects and company vision at events, incorporating tech innovation and youth empowerment.
